

## Resizing Logos and Icons Using a MAC

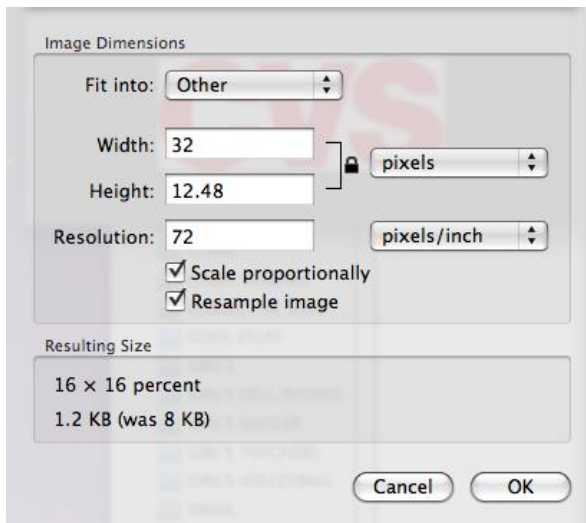

After you download the file to your desktop, double click on it and PREVIEW will open. Scroll over to "TOOLS" in the top menu bar and drag down to "ADJUST SIZE".

You will get a window that looks like this:

Check "Scale proportionally" and "Resample image" then you can adjust the width or height to 30 pixels. Both height and width must be 30 pixels or less to upload as an Icon.

Click OK and go to "File" and click on "Save"
